

ePort Interactive

The next generation of unattended retail.

ePort® Interactive is the unattended industry's most advanced cloud-based interactive media and content delivery management system in a secure PCI DSS compliant environment. Welcome to Retail 2.0

Innovative Technology

ePort® Interactive is all-in-one cashless payments, telemetry, and consumer interface system supporting traditional magnetic stripe credit, debit cards and NFC (Mobile Wallet) payments along with the ability to display nutritional information, issue remote refunds, serve up coupons and much more. In addition, a vibrant, full-color touch screen allows for eye-catching display of national or custom marketing and promotional campaigns. The hardware is supported by the full ePort Connect suite of services and integrates seamlessly with most Vending Management Systems through a simple DEX interface.

Broad Applications

The minimalist design of the hardware and superior security features of both the device and the ePort Interactive platform make it the undisputed best-in-class solution for operators looking for an unattended payment solution.

The ePort Interactive is built on an open, flexible platform that offers an array of high tech consumer engagement and content delivery options, including:

On-screen Nutritional Facts: Dynamically displayed, detailed product information is available on-screen to inform the consumer about products prior to purchase. The ePort Interactive platform aligns your machine with ACA requirements and addresses consumer preference for nutritional information.

On-screen Advertising with Interactive User Interface: Brilliant touchscreens attract customers and influence purchasing decisions. The Interactive touch screen offers opportunities to incentivize consumers through promotional codes, collect consumer feedback/product requests and deploy targeted marketing campaigns designed to influence specific purchasing behavior.

On-screen Refund Assistance: Streamline refund processing with an optional interface that creates unique, credit codes sent to customers instantly via SMS

Energize sales, increase customer satisfaction and capture the imagination of your consumer base with the power of ePort Interactive.

Value Added Services

Comprehensive Service and Support: To ensure that you have the support you need to keep your equipment working and your customers satisfied, our customer support team is on call 24/7.

ePort Connect® Our best-in-class suite of PCI-compliant, turn-key cashless payments and telemetry services designed to enable you to engage with your customers and improve your business.

USALive Our simple and secure, cloud based portal that allows our customers access to critical data about their business anytime, anywhere.

Quick Connect® Our flexible Web Service that gives developers an easy way to provide any Internet connected device (such as a kiosk or smartphone) simple and secure integration to USAT's, ePort Connect® suite of cashless payment services.

MORE Loyalty and Rewards The premier prepaid and loyalty program for the self service, unattended retail marketplace. MORE brings you closer to your customers, increases your sales and encourages more participation at your machines, driving more sales for you.

Two-tier Pricing Program Two-Tier Pricing gives you the ability to charge two different vend prices on your vending machines: one price for credit/debit cards and one lower, or "discounted" price for cash.

(text message). Operators have visibility into and can manage the “free vend” occasion on their mobile device or desktop without ever needing to alert a client, visit a machine or even put a refund into the mail.

Superior Data Protection: The ePort Interactive platform and touch screen device are part of the USAT ePort portfolio and come with the same peace of mind that we bring to all of our products by operating under the highest level of PCI compliance and security standards in the industry. USAT is certified by the VISA C.I.S.P. program and as an additional security measure, all ePort hardware passes the documented requirements for a PA-DSS audit regularly.

Fast Transaction Processing: High-speed wireless connections and state-of-the-art processing allows USAT hardware to achieve some of the fastest authorization responses in the industry.

Remote Management: All machine data is available through the USALive website that offers real time sales information, server-side health alerts for all connected machines, DEX Telemetry scheduling, account payment reconciliation, fill-to-fill reporting, and much more.

Cross-platform Compatibility: The ePort Interactive platform has seamless integration with all major VMS systems. Best equipped for full integration with VendMax, Cantaloupe and VendSys with export functionality well suited for Parlevel Systems and Vagabond.

Product Specifications

Device	ePort Interactive Cardreader/Telemeter
Manufacturer	USA Technologies Inc.
Verticals	Self Service, Unattended Payment uniquely suited for the Vending marketplace
Processing, Tracking & Real Time Reconciliation	Mag Stripe, NFC/RFID, Cash
Size of Card Reader	Height: 4.87” Width: 3.5” Depth: 2”
